## ALZHEIMER'S: INSULIN RESISTANCE AND NUTRITION

A 30 minute program to be released in 2020

Alzheimer's is rising to epidemic proportions in the United States and around the world. After billions of dollars spent on Failed research over the past 100 years there is now a breakthrough in understanding the cause of Alzheimer's. Surprisingly ,the cause arises from the same hormonal disorder that is at the core of obesity and diabetes: insulin resistance brought about by diet. Learn how these findings open the door for a cure for this deadly disease.

**HD  
Series**

## DIABETES: NUTRITION AND SUGAR

A 30 minute program

The diabetes epidemic is a post-World War II phenomenon. At the turn of the 20th century, type II diabetes was virtually unknown, now it is projected to affect half of the American population. A diagnosis of type II diabetes affects every aspect of a person's life: their lifespan is shortened by at least 10 years; they are at risk for kidney disease, blindness, obesity, amputations and the severe negative consequences brought about by the current medicines used to keep their blood sugar levels within normal ranges. This program looks at every aspect of the diabetes epidemic ... The dramatic new scientific findings regarding its causes ... The health consequences of being diabetic ... Its relationship to poverty ... And finally, startling new practices put forward by top scientists and nutritionists that are reversing and even curing diabetes through diet.

## THE DEADLY OBESITY EPIDEMIC

*A 90 minute feature*

With over two thirds of Americans overweight or obese, this chronic disease, obesity, has become the number one health problem in our nation and around the world. This disease that is killing our children is barely a blip on the radar of issues that need to be addressed. Why? The Deadly Obesity Epidemic documents how a food environment filled with sugar, sugary drinks and processed food changes people's food processing hormonal balance in such a way that it causes obesity and diabetes. This new understanding challenges the old energy imbalance model of obesity that has set up people to become fat and sick through no fault of their own, or through lack of willpower to control their diet and exercise more. The Deadly Obesity Epidemic challenges the medical community, the food industry and nutritional science to do better, before it's too late. This is a long term global challenge that has both health and economic implications!

**See Page 8 for NINE Extended Interviews from this series**

## FOOD AND AGRICULTURAL SCIENCE

7 Television half-hours

From planting and harvesting crops, to raising livestock, to managing soil and water resources, to chemical analysis and biotechnology in the lab, including gene editing and gene engineering, to agribusiness and Wall Street, to food preservation, nutrition and food safety, to feeding the world while protecting the planet's delicate ecosystems.

## PHYSICAL GEOGRAPHY: Making Sense of Planet Earth

*Series of eight, 30 minute programs*

**Physical Geography: Making Sense of Planet Earth** is an eight part HD series that explores the dramatic discoveries of the forces shaping planet Earth and provides a blueprint for understanding how place and process combined to shape every aspect of the planet's physical and cultural landscape. Host Dr. Alexander B. Murphy opens the door to a whole new way of seeing and making sense of the world in which we live.

Programs in this series:

- Program 1: Inventing the Tools of Geography
- Program 2: Portraying the Earth
- Program 3: Landforms
- Program 4: The Ever Changing Planet
- Program 5: Layering the Planet
- Program 6: Geographical Regions
- Program 7: Physical Geographic Influences on the Development of Human Societies
- Program 8: Human Impacts on the Natural Environment

Shot in High Definition.

Hosted by: **Dr. Alexander B. Murphy**

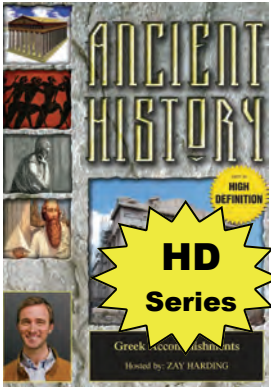

**Dr. Murphy**, is a renowned geographer and Chair of the National Academy of Science's study "Strategic Directions for the Geographical Sciences."

## ANCIENT HISTORY

Series of eleven, 30 minute programs

Globe Trekker's Zay Harding hosts this new look at the planet's ancient civilizations...civilizations that left behind remarkable ruins. Because they were ancient, originally archaeologists often viewed them as primitive and embroiled in war...Now we see them in a new light...In terms of accomplishments and unique variations on complex social organizations. This eleven part series is shot in stunning Hi Definition, the civilizations of Greece, the Incas, the Romans, the Anasazi and the Ancient Britons, are presented in this new light.

### The Rise of the Roman Republic

In *The Rise of the Roman Republic* learn how from the humblest beginnings, Rome rose up to become the first self-governing republic. Rome came to control much of the Mediterranean world.

### Military Triumphs and the Death of the Roman Republic

In the second half of the Republic, we see how the Romans became the greatest fighting force in the ancient world.

### The Rise and Fall of the Roman Empire

A series of good and bad emperors ascended to Rome's throne from 27 B.C. to 476 A.D. In 312 A.D., Rome's last great Emperor, Constantine, embraces Christianity, setting the stage for Rome's last great accomplishment - making Christianity one of the world's great religions.

### The Splendor of Imperial Rome

During the Imperial period, from Augustus to Constantine, Rome itself became the most magnificent city in the ancient world.

### America's Prehistoric Civilizations: The Mound Builders

The history of the 3000 year Native American tradition that culminated with the construction of cities rivaling any on the planet when Columbus landed in the New World.

### Ancient Britain: Stonehenge to Celtic Iron Age Hill Forts

Follow the 7000 year evolution of Ancient Britain's people - from the earliest Stone Age clans, to the builders of Stonehenge, to the formation of Bronze Age tribes and the founding of Iron Age Hill forts, all leading to the castle building kings and queens and knights that we all recognize today.

### Ancient Pueblo People: The Anasazi

They stand today much as their builders left them 500 years ago. These are the cities of the Anasazi, the ancient Pueblo people of the four corners region of the western United States. How the Anasazi became so successful with a social organization not governed by kings or queens or other hierarchical rulers is one of the great mysteries of ancient history.

### Greek Accomplishments

In this program, the story of how Greek thinkers laid the foundation for architecture, painting, sculpture, history, philosophy, medicine, literature, zoology, botany, mathematics, astronomy, theater, and finally, the western scientific methodology. It is a history of a series of brilliant Greek thinkers from Homer in 700 B.C. to Ptolemy in 150 A.D.

### The Greek City-State and Democracy

During the Golden Age of the Greek City States 2500 years ago, the ancient Greeks gave to the world something much more valuable than architectural wonders or material wealth...they were the ideas of democracy, liberty, freedom of speech and the pursuit of truth for truth's sake.

### The Incas

Six hundred years ago, the Inca people, located in present day Peru, forged an empire equal to that of the Greeks and Romans.

### The Maya

They were the world's first environmental farmers, creating a thriving agricultural society on poor land through advanced farming techniques and a profound sensitivity to their environment.

David L. Hudson,

## **FIRST AMENDMENT in the 21st Century**

*Series of eight, 30 minute programs*

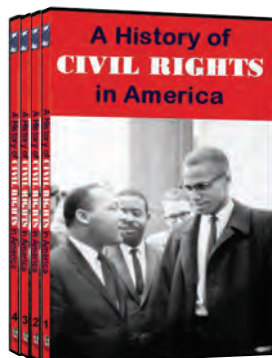

The First Amendment provides that "Congress shall make no law abridging the freedom of speech", this series looks at several significant First Amendment cases. Hosted by **David L. Hudson, Jr.** A scholar at the First Amendment Center, Hudson writes for The First Amendment Center and is author or co-author of 20 books, including several on the U.S. Supreme Court, the Constitution and student rights.

Programs in this series:

- Boy Scouts of America v. Dale: The Gay Scoutmaster Case
- Bartnicki v. Vopper: The Illegal Digital Intercept Case
- Zelman v. Simmons-Harris: The School Voucher Case
- United States v. American Library Association: The Internet Filtering Case
- Van Orden v. Perry and McCreary County v. ACLU of Kentucky: The 10 Commandments Cases
- Garcetti v. Ceballos: The Whistleblower Case
- Citizens United v. Federal Election Commission: The Campaign Finance Reform Case
- United States v. Stevens: The Dog Fighting Case

## **A History of CIVIL RIGHTS in America**

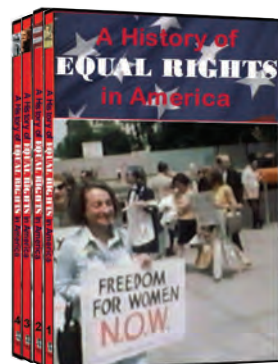

*Series of eight, 30 minute programs*

**A History of Civil Rights in America** offers a comprehensive historical overview detailing the expansion of civil rights to include more people. The series takes you through the development of the Constitution, the Bill of Rights, the 13th Amendment and 14th Amendments, civil rights legislation, court decisions as well as examining fearless civil rights leaders like *Rosa Parks*, *Cesar Chavez*, *Thurgood Marshall*, and *Martin Luther King, Jr.* From the past to the present, this eight part series takes the viewer through one of the most powerful forces in American History; the promise of equality for all.

Programs in this series:

- Program One: **1774 - 1833**  
 Program Two: **1834 - 1868**  
 Program Three: **1869 - 1916**  
 Program Four: **1917 - 1926**  
 Program Five: **1927 - 1961**  
 Program Six: **1962 - 1965**  
 Program Seven: **1965 - 1993**  
 Program Eight: **1994 - 2010**

## **A HISTORY of EQUAL RIGHTS in AMERICA**

*Series of eight, 30 minute programs*

**A History of Equal Rights in America** recounts the significant advances and the ongoing effort to gain a clear and permanent guarantee of equal rights and privileges for women and all economically disadvantaged groups. From the right to own property, to the formation of labor unions, Social Security, women's suffrage, consumer rights, equal pay, Title IX and the Disabilities Act. This series includes key historical individuals such as: *Susan B. Anthony*, *Horace Mann*, *Mary Lyon*, *Juana Briones*, *Betty Friedan*, *Madeleine Albright* and more.

Programs in this series:

- Program One: **1772 - 1837**  
 Program Two: **1837 - 1862**  
 Program Three: **1863 - 1902**  
 Program Four: **1903 - 1935**  
 Program Five: **1936 - 1963**  
 Program Six: **1964 - 1970**  
 Program Seven: **1971 - 1973**  
 Program Eight: **1973 - 2011**

## **GREAT AUTHORS of the BRITISH ISLES**

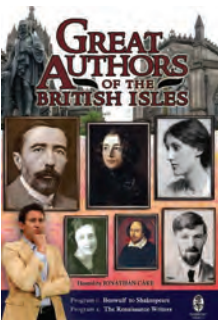

*Series of eight, 38 minute programs*

Host *Jonathan Cake*, introduces viewers to prominent British authors and literature from Beowulf through the 20th Century. The programs give an overview of the lives of the authors, and include a sampling of some of their best works. Themes, literary forms, literary styles, cultural, historical and political context are also touched upon.

Moving chronologically from Beowulf to Harry Potter, this eight-part series relies on location footage, reenactments, and dramatic monologues to survey the history of English literature. Shot in **High Definition**.

Programs in this series:

- Program 1: Beowulf to Shakespeare**
- Program 2: The Renaissance Writers**
- Program 3: Augustan and Romantic Poets**
- Program 4: Early Novelists**
- Program 5: Children's Literature**
- Program 6: The Genre Innovators**
- Program 7: 20th Century Poets and Playwrights**
- Program 8: 20th Century Novelists**

## **GREAT IRISH AUTHORS**

*Series of three, 29 minute programs*

Home to acclaimed authors, including four Nobel Prize laureates, Ireland has given the world a rich body of literature. Great Irish Authors, hosted by Ambrose Video Publishing's founder William Ambrose, focuses on the great Irish tradition of story-telling, including the plays of Oscar Wilde, George Bernard Shaw, and Samuel Beckett; the satire of Jonathan Swift; the poetry of William Butler Yeats and Seamus Heaney; and the novels of James Joyce, Bram Stoker and Frank McCourt. Shot in HD in Ireland, this series presents a clear and penetrating historical analysis of Ireland's greatest authors and their impact on world literature.

Programs in this series:

### **Program 1: The Classics**

Program one examines Irish literature from its beginnings in medieval Ireland, to its transition from Irish Gaelic to English, to the Irish literary tradition of satire, and finally to the rich and brilliant words of Oscar Wilde and Bram Stoker.

### **Program 2: Early 20th Century Authors**

Program two investigates how Ireland's turbulent early 20th century history also spawned a great Irish literary revival.

### **Program 3: The New Wave**

As World War II came and went, a new cadre of Irish authors emerged onto the world stage.

## **GREAT AMERICAN AUTHORS: Since 1650**

*Series of eight, 30 minute programs*

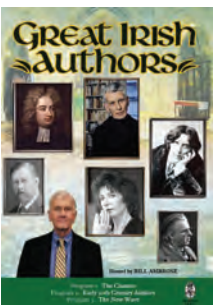

Presented by *Jane Kaczmarek*, the series presents the rich, literary tradition of American story-telling... A journey to find the nation's voice, beginning with the first colonists in the 17th century to a small cadre of brilliant, 19th century, New England writers who defined the unique American experience and soul. Featuring such greats as Poe...Dickenson...Twain...Alcott...Hemingway...Wolfe...Steinbeck...Vonnegut and Morrison, this eight part series presents the lives and literary output of over 60 of America's most read authors.

- Program 1: 1650 - 1845**
- Program 2: 1846 - 1855**
- Program 3: 1856 - 1906**
- Program 4: 1907 - 1925**
- Program 5: 1926 - 1939**
- Program 6: 1940 - 1949**
- Program 7: 1950 - 1957**
- Program 8: 1958 to Present**

**Jane Kaczmarek**

**Credits Include:**

*Law & Order: SVU, Reviving Ophelia, Pleasantville, Malcolm in the Middle, Felicity, Apollo 11, Frasier, & more*

## 21st Century Turning Points in US History

*Series of eight, 30 minute programs*

This series examines current events in U.S. History: our nation under attack on her own soil, a natural disaster destroying one of her major cities, Americans facing the greatest economic crisis since the Great Depression, the nation's deteriorating infrastructure, the country's first African American President, the internet, and mapping the human genome and the Trump Presidency. **One new program added! 2017-2020 Through to the COVID-19 Pandemic**

## Railroads in U.S. History (1830-2010)

*Series of four, 30 minute programs*

This series offers a fresh perspective on how railroads created and shaped America's financial institutions, America's singular brand of capitalism and its unique way of doing business. The historic spectrum covered ranges from the first steam engines and lines built in the early 1800s, through the creation of the transcontinental railroad at the end of the 19th century, up to the current state of the industry.

Hosted by Actor **Gregory Wagrowski**.

## 20th Century Turning Points in U.S. History

*Series of eight, 30 minute programs* Arranged in chronological fashion and high-lights significant developments in science, art, politics, technology, and popular culture, providing a clear overview of the people and events that distinguished the 20th century. Rare archival footage and photographs, authentic recordings, and other primary source documents bring history to life, while stunning graphics and engaging narration lend context and clarity to the subject.

## 16th and 17th Century Turning Points in U.S. History

*Series of four, 30 minute programs*

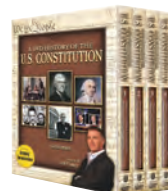

The 16th and 17th centuries were the formative 200 years leading to the creation of the United States of America. They started with Spanish conquistadors exploring the southeastern United States and ended with 12 English colonies firmly in place along the Atlantic seaboard with well established ideals of self governance, democracy and religious tolerance.

## 19th Century Turning Points in U.S. History

*Series of eight, 30 minute programs*

America entered the 19th century as an agricultural nation of 16 states and 5.3 million people. By the end of the century, the nation was an industrial power of 45 states and 76 million people. This series highlight significant historical events, scientific milestones and cultural achievements of this century.

## A DVD History of the U.S. Constitution

*Series of eight, 30 minute programs*

In this series see how the Constitution has protected the American people from the abuses of power and tyranny. How for over two centuries the principles set forth by the U.S. Constitution have empowered Americans to excel and aspire to greatness - great art, great literature, excellence and leadership in science, technology and the world's most prosperous and powerful nation. Hosted by **Jeff Fahey**.

## 18th Century Turning Points in U.S. History

*Series of eight, 30 minute programs*

As the 18th century dawned on the North American continent, four powers, the French, the Spanish, the British and the Native Americans were competing to see who would control this remarkable land. However after half a century of almost continuous wars, a new entity emerged, The Americans. By the end of the 18th century, the Americans created the greatest experiment in self-government the world has ever seen.

## The Complete DVD History of U.S. Wars: 1700-2004

*Series of eight, 30 minute programs*

Actor **George Kennedy** hosts this comprehensive study of U.S. wars. Moving chronologically from the 1702 Queen Anne's War to the 2003 Gulf War, this series blends a variety of visuals, including animated maps, film clips, costumed reenactments, period paintings, and location shots, with straightforward narration to examine the origins and outcomes of each conflict.

## A History of Jewish Achievement in America

Beginning with the first Jewish immigrants who arrived in North America over 350 years ago, the series highlights the brave patriots who fought to free America from the chains of Britain and ends with young entrepreneurs; who in the 21<sup>st</sup> century opened up the new age of digital information. This series is a fresh and remarkable perspective on one of America's great minorities. Narrated by Actress **Mare Winningham**.

## A History of Black Achievement in America

*Series of nine, 30 minute programs*

This series documents Black Achievement in American history, its defining role in the growth of the country, and its influence on current events. Presented by **James Avery**, the series highlights the many contributions of Black Americans that have influenced our culture, enriched our society with their achievements, and shaped the history of the United States.

**NEW 9th program: The Barak Obama Era**

## A History of Chinese Achievement in America

*Series of eight, 30 minute programs*

Join host **Archie Kao** as he shares the incredible story of Chinese American Achievement from the first wave of immigrants in California's gold fields to the entrepreneurs of the 21<sup>st</sup> Century Information Age. There are over 40 stories of Chinese American achievers who have helped shaped America.

## A History of American Indian Achievement

*Series of eight, 30 minute programs*

Host **Tyler Christopher**, a 21st Century American Indian, tells a story of early cultural achievements in art and architecture, a story of survival overcoming attempts at extermination by the dominant culture, and a final story of little known accomplishments in this enlightening tribute to the American Indian.

## A History of Women's Achievement in America

*Series of eight, 30 minute programs*

American women led the fight to end slavery, limit corporate power, provide education, and to protect the poor, the disenfranchised, the immigrants and the insane. At the same time, these unique American women would have to fight tirelessly for their own equality in politics, education and the workplace... even the right to vote. Presented by **Donna Mills**.

## A History of Hispanic Achievement in America

*Series of eight, 30 minute programs*

The contributions of Hispanics to the development and success of America are woven into many segments of the nation's history. To envision America untouched by Hispanics is to imagine a country without much of its folklore and many of its achievements. Hosted by **Patrica Lopez**.

## California

*Series of five, 30 minute programs*

The story of California is recounted from the first inhabitants to its current population and the challenges facing the state via narration, early film clips, re-creations from history, old photographs, and breathtaking present-day film footage and photos. The programs cover geography (including the tectonic and volcanic activity that formed the mountain ranges, valleys, and the coastline). In the final segment, experts on water resources and geology talk about the causes and effects of climate change and the efforts to combat it.

## Pacific Northwest

*Series of three, 30 minute programs*

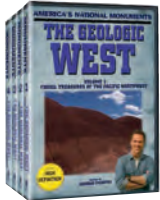

The Pacific Northwest is one of the most extraordinary regions of the United States. It is a region shaped by volcanism and is a land that became an agricultural paradise. The Pacific Northwest has an economy that combines the proven industries of the past with the glorious technologies of the future but it is also a leader in green technology.

## America's National Monuments: The Geologic West

*Series of four, 38 minute programs*

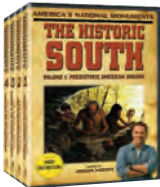

Host **Jordan Murphy** guides viewers on a spectacular tour of the Pacific Northwest's eleven National Monuments. Its history tells the story of coastal American Indians, Spanish settlement, the Lewis and Clark expedition and the Oregon Trail. The Geologic West is a priceless voyage from the dawn of history to the present. Shot in **High Definition**.

## Miracle of the HUMAN BODY

*Series of eight, 30 minute programs*

The human body is one of the most miraculous machines in the world. This contemporary series on the human body reflects the modern advances made in medical technology. Shot in beautiful **high definition** the program will allow the viewer to look inside the major systems within the human body. State of the art graphics and 3D animation crystallizes the miracle the human body functions represent. Presented by **Dr. Mark Reisman**.

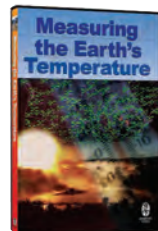

## America's National Monuments: The Historic South

*Series of four, 40 minute programs*

Join **Jordan Murphy** as he explores eleven spectacular National Monuments throughout America's historic southland. Travel from the prehistoric ruins of Louisiana, Georgia and Alabama to the spectacular underwater world of the Virgin Island's coral reefs.

Each monument is shot in **High Definition** and presented in three segments:

- 1 - Virtual Tour
- 2 - Nature and Science
- 3 - History and Culture

## Measuring the Earth's Temperature

*One 29 minute program*

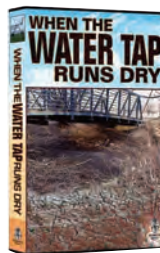

The viewer is taken through the earliest weather stations and balloon launches, to a network of super weather stations constructed in the 21st century. Highlights include showing how weather balloon launches work, the anatomy of a weather station, and how weather data, using computers, is transformed into long and short term weather forecasts. This very same data is also used to graph yearly temperature changes across the planet.

## America's National Monuments: Legacy of the Great Plains

*Series of four, 30 minute programs*

America's National Monuments tell the story of our country's history, ecology, geology and beauty preserved for all Americans. In Legacy of the Great Plains, 10 monuments associated with America once vast grasslands are featured. Shot in high definition and presented by **Bo Svenson**. Shot in **High Definition**

## When the Water Tap Runs Dry

*One 40 minute program*

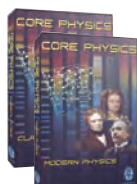

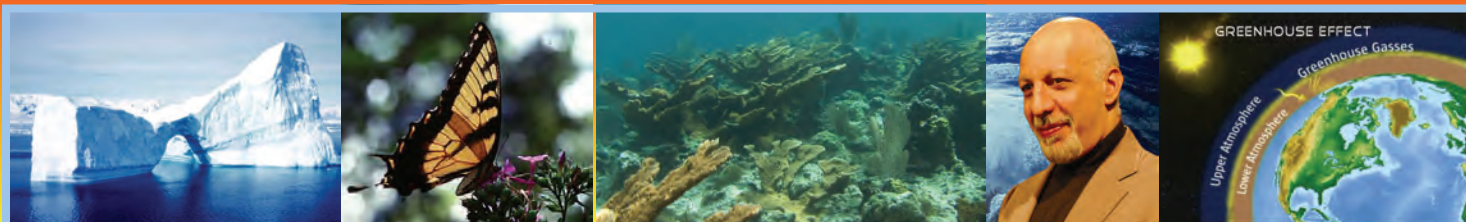

The greatest impacts from climate change will not be warmer temperatures but water shortages. We will look at these issues and provide essential solutions based on a new vision of America's water infrastructure, and customized water rights agreements.

# High Quality Educational Programs for Television

For Full descriptions, professional reviews and video clips go to [www.ambrosevideo.com](http://www.ambrosevideo.com)

## **Core PHYSICS**

*Series two 35 minute programs*

Programs introduce core concepts in the field of physics (matter, energy, forces, space, and time) in chronological order, beginning with studies of light in 1814, and ending with an examination of quarks, discovered in 1964.

## **LIFE AFTER OIL: New Energy Alternatives**

*One 32 minute program*

Alternative energy possibilities are described (wind power, fuel cells, hydrogen fuel, ethanol, biomass, and solar power). The explanations are precise and include the positive and negative aspects of each energy source.

## **Core CHEMISTRY**

*One 30 minute program*

An overview of the development of modern chemistry, divided into historical periods. The sections are: Ancient Chemistry; Electrolysis Reveals Water Is Not Elemental; Atomic Theory of Matter; Organic Chemistry; The First Periodic Table; and Catalysts and New Chemicals.

## **GLOBAL WARMING: The Rising Storm**

*Series of two, 57 minute programs*

Shot in **High-Definition** this series is presented and narrated by **Bradley Whitford**. This 2 program series examines and explains this phenomenon of climate change, and looks into the future where other, more deadly impacts are predicted to follow. Scientists from the USGS, NOAA and UCAR are among those interviewed.

## **GLOBAL WARMING: Science and Solutions**

*Series of two, 58 minute programs*

Narrated by actor **Erick Avari**, the film traces humanity's ecological impact throughout history, focusing primarily on the modern age. Scientists champion different solutions to resolve the problem but agree that action must be taken. Current and archival film footage and animated graphs support the concepts presented. Shot in HD.

## **Core METEOROLOGY**

*Series of three, 30 minute programs*

These films explore meteorology from three interrelated aspects, providing a thorough understanding of what meteorology is, how it works, and its impact on our daily lives. Programs include interviews from chemists, physicists, and climatologists as well as archival footage & animated graphics illustrate the basic principals of this evolving field.

## **Core BIOLOGY**

*Series of four, 30 minute programs*

Take a journey through the major turning points in the Biological Sciences; explore discoveries in plant and animal sciences, genetics, microbiology and environmental science.

## **Core GEOLOGY**

*One 33 minute program*

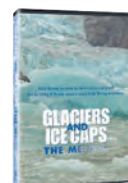

Core Geology traces the historical development of geological ideas from the 16th century to the present While highlighting many scientists and their important discoveries related to geology.

## **GLACIERS**

*One 34 minute program*

"Glaciers Past and Present" highlights the changes of ice sheets during the last 1.8 million years. Glacial features such as cirques, hanging valleys, fjords, eskers, kettle lakes, and drumlins are explained in detail.

## **GLACIERS and ICE CAPS: The Melting**

*One 30 minute program*

Scientists in the Arctic and Antarctica show how the world's great ice sheets and polar caps are disappearing, while computer graphics help illustrate concepts, demonstrating how overall warming affects ocean levels, movement of currents, and ice caps.

## **Core ASTRONOMY**

*One 38 minute program*

Viewers are introduced to key figures in the field and their major theories and concepts, such as Galileo's defense of a heliocentric solar system, Newton's three laws of motion, and Einstein's theories of special and
